

The Fundamentals of Linux

Caleb Meyer

Agenda

- What is Linux?
- Read 400 **man** pages
- Writing your first printer driver
- 10 flavors of awful C code
- Common pitfalls with shell scripting
- What to do when Linux crashes
- The best way to shave a yak
- Linus Torvalds: the man, the myth, the legendary ego

The ~~Fun~~ of Linux

AKA “How to Train
your Penguin”

Open Source and The FREE SOFTWARE FOUNDATION

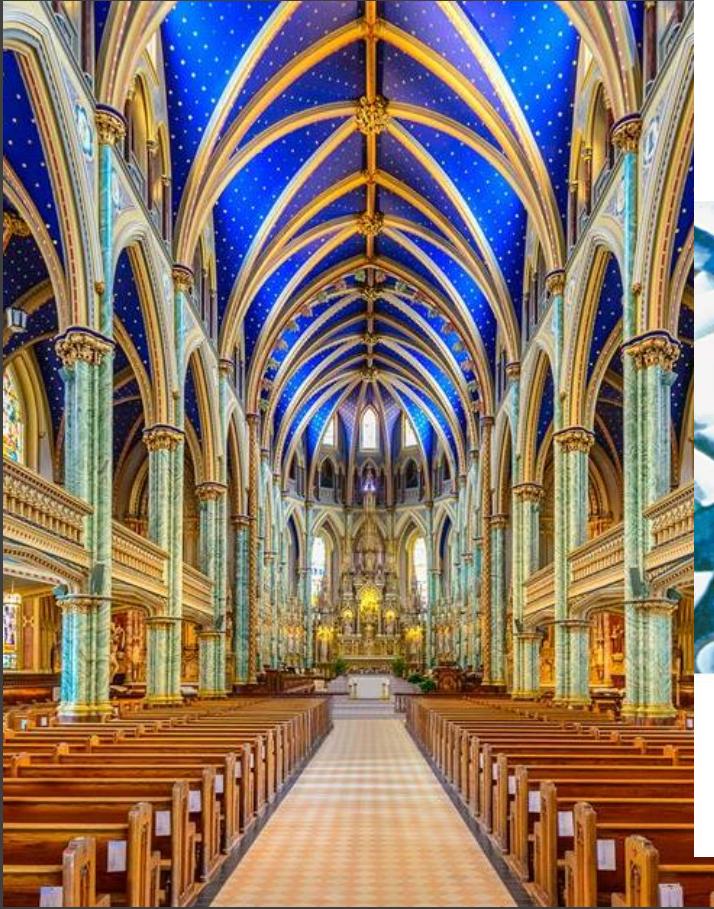

'Free software' is a matter of liberty,
not price. To understand the
concept, you should think of 'free' as
in 'free speech,' not as in 'free beer'.

— *Richard Stallman* —

The Creation of Linux

Revised & Expanded

“The most important book about technology today,
with implications that go far beyond programming.”
—Guy Kawasaki

Anyone else miss crossfade in Winamp?

Every app. Every element. Perfect for anyone working in professional photo and video environments.

Linux Fragmentation

This is a tiny piece, maybe 10% of this full chart.

The Birth of the Distribution

The Birth of the Distribution

The Birth of the Distribution

Why?

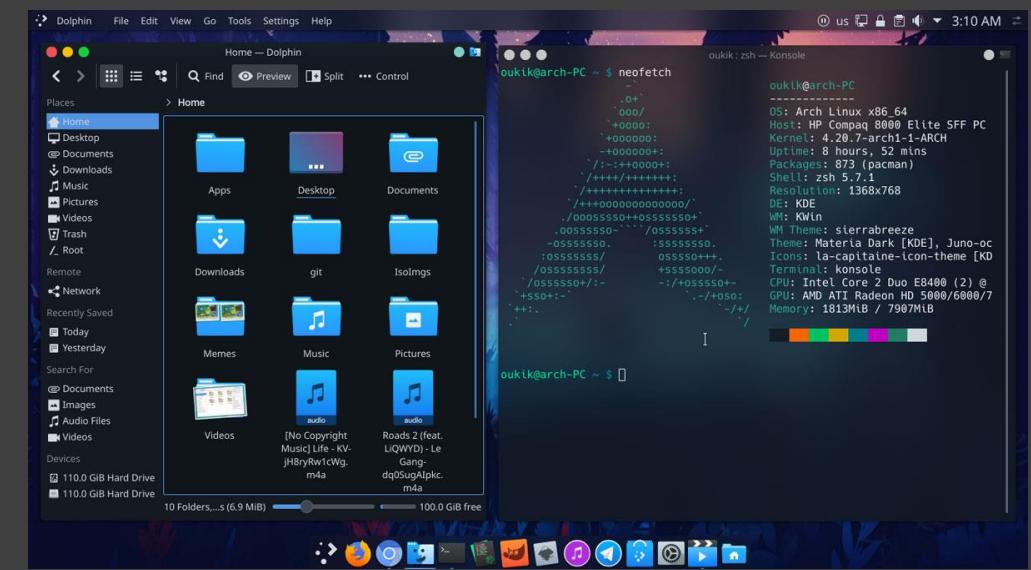

Why?

A screenshot of a Twitter post by Taran Van Hemert (@TaranVH). The post reads: "A Windows 10 update forces a full screen @MicrosoftEdge window, which cannot be closed from the taskbar, or CTRL W, or even ALT F4. You must press 'get started,' then the X, and even then it pops up a welcome screen. And pins itself to the taskbar." Below the text are four screenshots of the Microsoft Edge browser window. The first shows a blue background with the Microsoft logo. The second shows a promotional message for "Check out the new Microsoft Edge". The third shows a "Welcome to the new Microsoft Edge" screen with a "Import from Mozilla Firefox" button. The fourth shows a standard Microsoft Edge homepage.
